

Edge Sander

Brush and belt sanding machine installed with BSA sanding wheel, brushes and sanding cloth.

The BSA sanding system is the most flexible sanding system worldwide.

The sanding system is not only flexible but is also the most **COST SAVING** brush sanding system worldwide.

The belt and brush sanding machine from BSA makes the perfect finish on the edges.

The belt and brush combination ensure a perfect surface on the edges.

Brush Sanding Units:

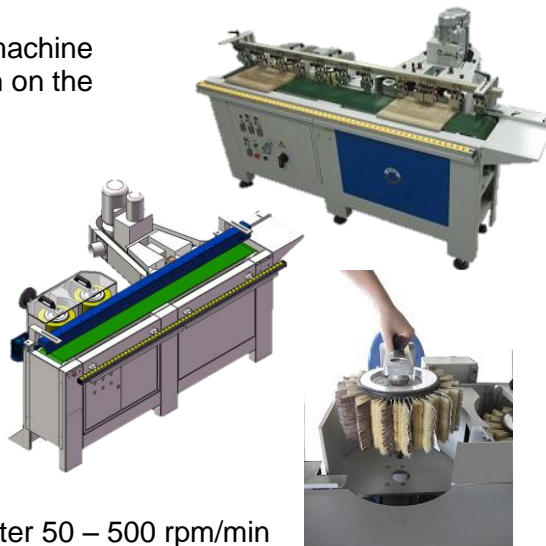

The Brush Sanding units are installed with 2 x 180 mm quick change wheels with a flexible combination of brushes and sanding cloth.

2 x 0.37 KW motor adjust by inverter 50 – 500 rpm/min with digital display

Belt Sanding Units:

The belt sanding units are oscillating to ensure the life time for the sanding paper and to ensure the high finish on the surface. The long belt on the machine makes a cold sanding and increases the life time for the belt

1 x 1.1 KW motor adjust by inverter 50 – 500 rpm/min with digital display

BSA-BBES-100-3U

Feeding motor: 1 x 0.55 KW
motor adjust by inverter

Feed speed: 5–15 m/min. adjust
by inverter with digital display

Thickness adjust: 5-80 mm

Working height: 865±35 mm

Length of conveyor: 1800 mm

Size of machine: 2400 x 1200 x
1200mm

Weight of machine: 1000KG

Dust extraction hood: Ø 90 x 2

Electrical specifications: 380 volt
50 Hz

Totally: 2.4 KW

Machine left hand operated
